### DETAILED ACTION

Claim 1 is pending and under examination.

#### *Specification*

The abstract is objected to because it does not reflect the nature of the invention of this application. The current abstract reflects the nature of the invention of the parent application.

The specification is objected to because the information for the "Related Applications" should be updated to reflect change in the status of U.S. 09/795,996 to a patent.

The specification is further objected to because on page 3 there is a reference to a co-pending application by no serial number is specified.

#### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Boskovic et al. (US 5,124,162).

Boskovic discloses an antioxidant-free, stable fixed flavor which is prepared by combining a flavor, maltose, maltodextrin and a film former to make a mixture and then spray-drying the mixture to form a dense product (abstract). Boskovic provides disclosure relating to the relative

amounts of maltose and malto-dextrin, as well as the preferred DE range for the latter (col. 6, lines 9-30). The step of instant claim 1 relating to providing an amount of a dextrin to enhance the susceptibility of the maltose-containing product to be spray-dried is considered to be a mental step in the absence of any physical steps to determine this optimization. However, Boskovic meets these limitations because the disclosure of the desired relative amounts of maltose and maltodextrin are provided to optimize the spray-drying qualities of the mixture to form the desired dense product.
